## INTRODUCTION

The Williams Settlement and subsequent legislation address four key areas and assign specific monitoring responsibilities to County Superintendents of Schools. These key areas are:

1. **Instructional materials** – Students must have sufficient access to standards aligned materials or textbooks;
2. **Facilities maintenance** – Schools must be in “good repair” (safe, clean, and functional);
3. **Teacher credentialing** – Teachers must have proper certification or training, especially for classes with 20% or more English Learners; all classes must be assigned a permanent teacher of record.
4. **Public reporting** – School Accountability Report Cards (SARC) must include information on Williams; non-compliance with Williams must be incorporated in Uniform Complaint Procedures and classroom posting of notices;

This report summarizes the findings of the Williams monitoring in the past year. Teacher credentialing was monitored during the 2006-07 school year and teacher vacancies were monitored during the first month of the 2007-08 school year. All instructional materials and facilities monitoring was conducted during fall 2007. The results of these monitoring activities are presented in the following sections.

All monitoring during the 2006-07 year was based upon a list of Deciles 1-3 schools according to 2003 API scores (Appendix B). The teacher credential monitoring results presented in this report were collected over the course of 2006-07. All other 2006-07 monitoring results (Instructional Materials, Facilities, SARC compliance) were reported in the 2006 Annual Report.

In 2007, the California Legislature updated the list of schools subject to monitoring based upon the Deciles 1-3 schools according the 2006 API rankings (Appendix A). These schools were subject to Williams Monitoring in fall 2007 (Instructional Materials, Facilities, SARC compliance, and Teacher Vacancies), and the results are presented in this report.
